

What are the different battery options for a wild?

Our different battery options allow you to set up your Wild for how you like to ride. For those of you who want the freedom of WILD's huge 750Wh internal battery, it is available on all sizes and offers a great balance of weight and range. The 600Wh battery is 1.3kg lighter than the 750Wh, whilst still giving plenty range for long rides.

How much battery does a Bosch wild have?

There are two battery options for the Wild: 600Wh for those bothered about weight, and 750Wh for those wanting more range. The 750Wh version is the older, heavier Powertube design from Bosch though, with a claimed weight of 4.3kg (or 400g heavier than the new Powertube 800), so be warned.

Is wild a bike?

Welcome to a world beyond power. A world where far and fast is taken for granted. Whatever question the trail poses, the answer is always yes. Wild is a bike built without compromises. Lightweight and fully optimised, it leaves our factory ready for action with the latest Bosch motor and race-ready build kits.

What kind of motor does the wild M-Ltd use?

Our M-LTD test model is the only version in the WILD range to rely on a Bosch Performance Line CX Race motor and 625 Wh battery, while all of the other WILD variants come equipped with a conventional CX motor. Tipping the scales at 22.3 kg, it's one of the lighter full-fat competitors in the test field.

Does spypoint have a battery pack?

Specially designed rechargeable Lithium Battery pack for Spypoint cameras (except Force 20 & Link-Micro). Connects to Stick Up Cam Battery for a continuous charge, so you'll never run out of power. The Bushnell Trail Camera Solar Panel extends your trail camera battery life by months.

What is the best battery pack for a trail camera?

The best disposable batteries for all wildlife/trail cameras. The Browning Trail Camera External Power Pack doubles the power available to your camera - so you can leave it for longer without worrying about the batteries. Specially designed rechargeable Lithium Battery pack for Spypoint cameras (except Force 20 & Link-Micro).

For all solar, wind and battery powered lighting systems, the high efficiency of CFL bulbs are extremely important. Typical applications include: lighting for buildings, motorhomes, boats and a wide range of battery powered applications. These CFL bulbs can be fitted to most standard Edison Screw (ES) light fittings.

For the future, as Tim says, get a Battery Maintainer. I have an Ablemail AMT12 fitted and use the Manual Option that forces the Leisure Battery to transfer current to the Vehicle Battery for 9 seconds in every 10 to ensure that the latter survives a Scottish Winter unscathed! I also went mad and had an Ablemail ABB07 fitted so that the state of charge for both batteries ...
